PROFESSIONAL SUMMARY

Computer Science graduate from CIT-U with hands-on experience developing Single Page Applications (SPAs) and web platforms using **JavaScript, TypeScript, HTML5/CSS3, React, and Node.js**. Demonstrated strengths in **troubleshooting, bug fixing, and REST API integration** through QA testing at DXForm Technologies and cloud infrastructure work at Opswerks. Well-versed in **Scrum methodology**, responsive UI design, and database modeling. Eager to contribute clean code and continuous learning to **Digital Room** as a Junior Developer.

TECHNICAL SKILLS & COMPETENCIES

Frontend & Web: JavaScript (ES6+), TypeScript, HTML5, CSS3, React, Single Page Applications (SPAs), Angular (Basics), Responsive Design
Backend & APIs: Node.js, Express, REST APIs, API Integration, Python, Django, WebSockets
Databases & Cloud: PostgreSQL, MySQL, Supabase, AWS (AWS Academy Graduate, Lambda basics), Docker, Linux
Troubleshooting & Tools: Production Troubleshooting, Bug Tracking & Fixing, Software Quality Assurance, Git, Postman, Scrum Methodology, Jira

WORK EXPERIENCE

DXForm Technologies | QA Analyst & Web Development Intern (2025 — Cebu City)

- Tested, troubleshot, and identified functional and UI defects across 4 client web applications in an **Agile/Scrum development environment**.
- Validated **REST API integrations**, client-server data flows, and cross-browser rendering standards using Chrome DevTools and Postman.
- Collaborated with software engineers to reproduce, isolate, and verify bug fixes, contributing to zero-defect production releases.
- Authored clear technical documentation and bug tickets with reproducible steps in Jira to accelerate team problem resolution.

Opswerks | Site Reliability Engineering (SRE) Intern (2026 — Cebu City)

- Monitored web application availability and troubleshot server-side issues across Linux environments and containerized microservices.
- Worked with AWS cloud infrastructure, Docker containers, and automation scripts to maintain reliable application performance.
- Practiced disciplined incident triage, log analysis, and root-cause troubleshooting for production services.

FEATURED WEB DEVELOPMENT PROJECTS

TakeIt — Event Management & Ticketing Platform (2024) | *JavaScript, React, Node.js, PostgreSQL, REST APIs*

- Built a responsive **Single Page Application (SPA)** enabling users to browse events, select seats, and complete online ticket bookings.
- Engineered backend **RESTful API endpoints** in Node.js to handle booking requests and integrate database transactions with PostgreSQL.

Nexchef — Culinary Web & Mobile Application (2024–2025) | *TypeScript, React, Node.js, Supabase, REST APIs*

- Developed an interactive recipe app featuring live synchronized cooking timers and dynamic step tracking.
- Implemented **REST API integrations** and real-time state persistence using Supabase for user sessions and saved recipes.

CropConnect — Farmer-to-Consumer E-Commerce Platform (2024) | *JavaScript, HTML5, CSS3, Python, MySQL, REST APIs*

- Designed and built a responsive e-commerce web platform connecting local producers directly with buyers, featuring shopping cart and order tracking.

Fusion Rush & Visual AI Research (2025–2026) | *Python, JavaScript, Scopus ICETT 2026 Paper & PCSC 2026 Congress*

- Published and presented research on AI-assisted logic parsers and gamified learning platforms, developing core algorithm verification logic.

EDUCATION & CERTIFICATIONS

Cebu Institute of Technology - University — B.S. Computer Science (2022–2026) | *Presidential OIC, Koro Teknoy Chorale*
Philippine Science High School - Central Visayas Campus — STEM Strand (2016–2022) | *Graduated With Honors, Dean's Lister*
Certifications: PhilNITS Fundamental Engineer (FE, Apr 2025) | TOPCIT Level 3 Expertise | AWS Academy Graduate (Cloud Foundations & Cloud Architecting)
