To: Foundry Talent Acquisition
Company: Foundry for Good
Position: Software Engineer (Remote / Philippines)

Subject: Application for Software Engineer

Dear Foundry Talent Acquisition,

I am writing to express my enthusiastic interest in the Software Engineer position at Foundry for Good. With a solid Computer Science degree from Cebu Institute of Technology - University, practical industry experience in Site Reliability Engineering at Opswerks and Software QA at DXForm Technologies, and Scopus-indexed research recognition in intelligent systems, I am confident in my readiness to make an immediate, positive impact on your remote engineering team.

Throughout my work, I prioritize reliability, clean architecture, and performance. During my SRE internship at Opswerks, I administered Linux environments, configured Kubernetes pods and Docker containers, and automated operations across AWS infrastructure. Furthermore, having completed 250 OJT hours as a QA Analyst at DXForm Technologies validating four client web and mobile applications, I bring a systematic test-driven mindset that aligns directly with Foundry for Good's requirements for Python, TypeScript, React, AWS.

In addition to cloud infrastructure and reliability engineering, I actively innovate in software development. I authored 'Fusion Rush: Enhancing Proficiency in Boolean Logic Algebra through Gamification', accepted at the Scopus-indexed ICETT 2026 conference, and developed a Visual AI Logic Proof Parser presented at the Philippine Computing Science Congress (PCSC 2026). Holding credentials including PhilNITS Fundamental Engineer (FE), TOPCIT Level 3, and AWS Academy Graduate, I am well-equipped for proactive, autonomous remote execution.

I would welcome the opportunity to discuss how my technical versatile background, reliability mindset, and passion for excellence can support Foundry for Good's engineering initiatives. Thank you for your time and consideration.

Sincerely,

Roddneil B. Gemina
Software Engineer | SRE & Full-Stack Developer | Visual AI Researcher
